

## **Ipamorelin/Sermorelin Blend** (injectable)

### **Release the Power of Growth Hormone, Naturally!**

As we age, our growth hormone releasing factor declines which leads to a decline in pituitary growth hormone production. In addition, physical changes to our bodies can lead to a decrease in the production of supportive peptides and essential amino acids.

Ipamorelin and Sermorelin are growth hormone releasing peptides (GHRPs) that work synergistically to stimulate your body's natural growth hormone production. Their strength-building, anti-aging, and healing properties have made them a popular option for those looking to control body weight and build lean muscle.

### **Ipamorelin and Sermorelin have been shown to help,**

- Build Lean Muscle & Improve Muscle Strength
- Increase Muscle Definition & Density
- Reduce Body Fat
- Improve Sexual Function
- Boost Energy & Vitality
- Improve Quality of Sleep
- Relieve Chronic Pain
- Increase Bone Density
- Promote Joint & Ligament Repair
- Smooth Wrinkles & Promote Healthy Skin

Our unique blend maximizes your body's full potential by stimulating the release of your natural growth hormone to promote energy, stamina, strength and vitality. Though powerful enough to promote natural production, they produce no extreme spikes in cortisol or prolactin and no major spikes in hunger, unlike many popular peptide releasers.

Combined with a healthy diet and regular exercise, this powerful blend can help to combat the undesirable effects of aging and assist you in achieving and maintaining a more healthy, strong, youthful physique.

## **Ipamorelin/Sermorelin** (injectable)

**Maximize your body's full potential by stimulating the release of your natural growth hormone to promote energy, stamina, strength and vitality.**
