

L-Arginine

**ESSENTIAL AMINO ACID
(injectable)**

As an essential amino acid that is needed for normal body function and healing; L-Arginine has many great benefits. It stimulates the production of growth hormone, increases blood flow, and is particularly useful in the healing process.

L-Arginine has shown promise in reducing bad cholesterol and lowering blood pressure; it is used to treat impotency and sexual dysfunction in both men and women.

Benefits of L-Arginine;

- Accelerates Healing After Injury
- Helps Burn Fat and Build Muscle
- Improves Blood Flow to the Heart & Brain
- Fortifies Your Immune System
- Helps with Erectile Dysfunction
- May Help to Stimulate Sex Drive

L-Arginine helps in the synthesis of nitric oxide which the body uses to relax blood vessels. When blood vessels are relaxed, blood flow to the heart and brain increases significantly. Subsequently, L-Arginine is thought to help with erectile dysfunction by increasing the flow of blood to the genital area. Some studies also suggest that L-Arginine may help increase sperm counts and stimulate sex drive.

Since L-Arginine improves the balance of nitrogen, it allows the body to covert more protein into muscle; and extra lean muscle mass helps to burn fat, even when you're not active.

In addition, L-Arginine stimulates activity of the thymus gland which in turn bolsters your immune system to keep you healthy.

L-Arginine

**ESSENTIAL AMINO ACID
(injectable)**

L-Arginine increases blood flow for a healthier heart and a happier sex-life! L-Arginine is used to reduce bad cholesterol, lower blood pressure, and accelerate healing. It allows the body to covert more protein into lean muscle which helps to burn fat, even when you're inactive.

A valid prescription is required.

At Andrologix Health and Wellness, we use only the highest quality, pharmaceutical grade products under strict quality controls.
