

CJC-1295/Ipamorelin

Growth Hormone Releaser (Injectable)

The CJC-1295 peptide is a Growth Hormone Releasing Hormone (GHRH) analog, which means it stimulates natural growth hormone production and secretion. This powerful peptide can also increase IGF-1 levels with minimal effect on cortisol and prolactin.

CJC-1295 delivers naturally longer and stronger growth hormone pulses due in part to its longer half-life. CJC-1295 has proven to be both safe and effective. A study published in the US National Library of Medicine/National Institutes of Health concluded that *“Subcutaneous administration of CJC-1295 resulted in sustained, dose-dependent increases in GH and IGF-I levels in healthy adults and was safe and relatively well tolerated.”*

Ipamorelin is a 3rd generation Growth Hormone Releasing Peptide (GHRP) which also mimics your body’s natural growth hormone production and boosts IGF-1 levels. Human growth hormone and IGF-1 are essential elements that promote healing and play an important role in regulating your metabolism. Ipamorelin is a “penta-peptide” made-up of five amino acids and is a selective growth hormone secretagogue, so it won’t negatively affect cortisol levels. In addition, Ipamorelin does not increase ghrelin, so you won’t get the increase in appetite you might experience with GHRP-6 or Ibutamoren.

CJC-1295 & Ipamorelin have been shown to:

- Increase Lean Muscle Mass
- Burn Visceral and Abdominal Fat
- Increase Energy and Vitality
- Improve Muscle Repair and Recovery
- Increase Libido and Improve Performance
- Improve Quality of Sleep
- Promote a Healthier Immune System
- Improve Memory and Cognition
- Improve Skin Quality for a more Youthful Appearance

These two powerful peptides working together are stronger and more effective than Sermorelin/Ipamorelin. This potent combination promises to deliver all the benefits of recombinant human growth hormone, but in a more sustained and natural way. That’s what makes this blend the ideal choice for athletes and active people seeking a strong and steady increase in GH and IFG-1 levels.

CJC-1295/Ipamorelin

Maximum HGH

This potent combination promises to deliver all the benefits of increased Growth Hormone levels in a stronger, sustained and natural way.
