

EXTREME PRO-FORMANCE SUPPLEMENTS  
A Division of Andrologix Health & Wellness

# Liv-R-Flush

(60 Capsules)

**Liver toxicity is an issue for everyone! Our Liv-R-Flush is designed to detoxify the liver and keep liver enzymes within normal range.**

Liv-R-Flush works as a preventative measure, as well as, a treatment option; meaning that this supplement can be used proactively to prevent problems from occurring and reactively to deal with elevated enzyme levels. This makes Liv-R-Flush a sensible addition to any preventive medicine regimen.

**Alpha-Lipoic Acid:** (ALA) is an organic compound that acts as a powerful antioxidant neutralizing free radicals from the cells of the body to reduce damage. It's both water-soluble and fat-soluble, which allows it to work in every cell in the body. However, humans only produce alpha-lipoic acid in small amounts, so many add supplements to optimize their intake. ALA has been studied for its ability to reduce liver fibrosis associated with hepatitis.

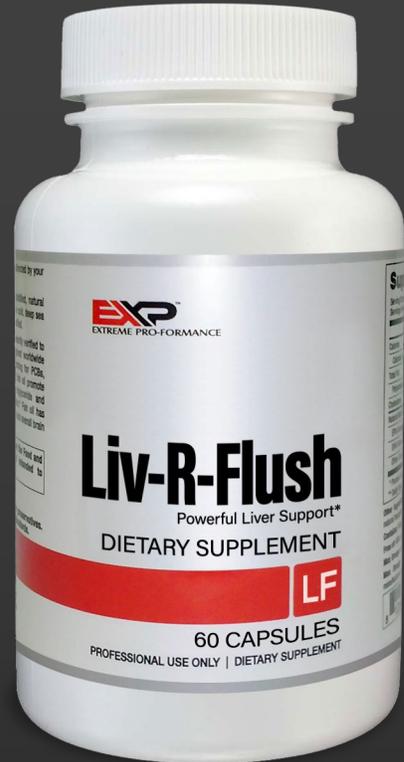

**Silymarin:** Insulin resistance and oxidative stress are the major mechanisms leading the cell damage in the liver. The results of clinical trials published in the US National Library of Medicine show that silymarin's antioxidant activity promotes liver cell regeneration, reduces inflammation and inhibits the formation of fibrous tissue in the liver. Silymarin may also help maintain healthy liver function by promoting glutathione production

**Selenium:** is a trace mineral known to support the antioxidant enzyme glutathione peroxidase. Selenium is an essential nutrient that our bodies cannot produce, so we must get it through our diet. Selenium is known to have antioxidant properties; it plays a critical role in preventing free radicals from damaging cells and DNA.

**NAC:** (N-Acetyl Cysteine) is a precursor for the synthesis of glutathione. It has the ability to replenish the most powerful antioxidant in the body, glutathione and plays an important role in your body's detoxification process. In fact, doctors often give intravenous NAC to people with an acetaminophen overdose to prevent or reduce liver damage. Due to its antioxidant and anti-inflammatory benefits, researchers feel that NAC may have applications for other diseases of the liver.

Every day our livers are overworked and overstressed by chemicals, poor food choices, excess alcohol, environmental pollutants and the constant stress of our hectic lives. Add Liv-R-Flush to help protect your liver and maintain healthy liver function. \*
